Dates: 02/08/2027 - 02/09/2027

Venue: Bob Bolen Public Safety Training Complex
Fort Worth, TX 76115

Price: $650

Instructors: Jake Labhart

Course Description:

IEP Night Vision Rifle Course | 2 Days

The IEP Night Vision Rifle Course is a performance-based course designed to enhance the shooter's ability to execute the fundamentals of shooting and movement on demand, regardless of lighting conditions. Day One focuses on IEP's shooting fundamentals, emphasizing the integration of marksmanship, movement mechanics, positional efficiency, and weapon manipulation. Students will progress from foundational concepts into dynamic shooting applications, developing the ability to move with speed and control while delivering accurate rounds on target sooner.

Day Two builds upon these fundamentals by transitioning into night vision operations. Unlike traditional NVG familiarization courses, this class is not focused on equipment selection, setup, or the differences between night vision systems and aiming devices. Instead, the emphasis is on maximizing performance with existing equipment. Students will be challenged to execute skills at increasing speeds while maintaining accuracy, efficiency, and control. The course will identify performance limitations unique to operating under NVGs and provide a progressive training methodology to overcome them.

The goal of this course is not simply to improve a shooter's performance during the two days of instruction, but to provide a deeper understanding of how to develop and sustain those skills afterward. Students will leave with a structured approach to NVG training progression, allowing them to identify individual deficiencies, establish performance benchmarks, and continue improving their capabilities through deliberate practice.

Equipment:
-NVGs
-Rifle w/ sling
—1000 rounds ammunition
-Minimum 3 mags
-Gun belt with mag carriers
-Laser recommended, not required (must have a red dot sight you can shoot passively, if you do not have a laser)
-Range attire
-Eye and ear protection
-Water and note taking material recommended

Disclaimer: This is not a NVG/laser familiarization course, you must show up with working knowledge of how to install/use your equipment. Refunds will not be given if you show up unprepared without appropriate gear.

Registration/Payment Instructions:
You must register as a member for any TTPOA course ($30 for one year individual membership)
Credit card payment is strongly recommended.

Last day to cancel for refund is 01/09/2027
