This Advanced Explosive Breacher course is in essence a continuation of our 6 day Basic/ Intermediate course. It is specifically geared toward experienced operators who possess a strong foundational knowledge and experience in tactical explosive breaching. Its intent is to elevate the operational capabilities of such operators and increase their ability to perform effectively under various conditions and changing environments.

Developed and based on years of real-world operational experience, this unique 5 day hands-on course concentrates on the tactical applications of Explosive Breaching during critical and dynamic incidents. Participants are taught the advanced skills necessary to safely and effectively implement explosive entry during high risk operations requiring unique charge constructions, expedient placements, and flexible methods of deployment in order to assure proper integration into various stages of a mission.
